BOOK SYNOPSIS

This book gives examples from healthcare institutions that are using IT automation and innovation to drive change and provides guidance on the strategic direction of HIT over the next five years. Improving the delivery of healthcare through HIT is vital for both the economic success of healthcare organizations and the care of the patient, but most EMR systems do not have an integrated and architected approach. This book provides a detailed approach on how to leverage IT for transformation. It also shows how to build upon the experiences of other industries and helps foster innovation by providing a vision of where technology can be an enabler.
